Go by Spark - How to view the events added to the Canvas in the Feed Editor?

The Feed Editor provides the ability for users to organize and make changes to the print program. After a print program is created, users can download it into PDF. The design and layout of the print program is pre-approved by the client.

Click on page 2 to view the events added on the Canvas (Daily planner) for this specific day.

Note: We are using our Demo Account to show the example below. However, keep in mind that depending on your Program's layout, the Daily Planner might be on a different Page and **not** Page 2, as shows our example.

4 Below is an example of the event's lineup. It populates automatically from the Canvas. For changes to be made on the lineup, users must change it on the Canvas.

Click "Events" on the left side column to view all the events title and descriptions taking place that day.
