

How to adjust overflowing Events?

On this guide we will show you what to do when the Events overflow the page on the feed editor.

When the number of events exceeds the available space in the Feed Editor, you can resolve the issue by following the steps below:

1

You can reduce the line height by clicking the **minus (-) icon** until the content fits within the page.

2

If the events still overflow the page after reducing the line height, you can hide events from the print program version.

To do that, click the **hamburger menu icon**, then select the **filter icon**.

3 Under **Mode**, select the **MCM** one, then click the **Print Program** checkbox.

This will filter only the events currently showing on the print program endpoint.

The screenshot shows the 'DAILY SCHEDULE' modal in the event management system. The 'MODE' section has 'MCM' selected. In the 'ENDPOINTS' section, the 'Print Program' checkbox is checked and highlighted with an orange circle. The background shows a 'PLAN YOUR Day' calendar and a list of events on the right.

4 By clicking the **newspaper icon**, you can easily choose which events will appear in the printed program and which ones will be hidden.

The screenshot shows the 'DAILY SCHEDULE' modal with the 'Print Program' checkbox checked. A new orange circle highlights the newspaper icon in the event list, which is used to toggle the visibility of events in the printed program. The background shows the 'PLAN YOUR Day' calendar and the event list.

5

Once you have confirmed that all events fit on the page, click **Export Program**, then select **Download PDF** to generate the file.

The screenshot displays a mobile application interface for managing events. On the left is a sidebar with navigation options like 'The Avenir', 'Export Program', and 'Collapse Actions'. The main area shows a grid of event listings with columns for time, event name, and location. A 'Success' dialog box is overlaid in the center, offering 'Download PDF', 'Download HTML 1', and 'Download HTML 2' options. On the right, a 'Content' sidebar lists various tags such as '2 PORTS', 'CASINO HEADER TAGS BL CASINO', and 'HALLOWEEN TAG'.
